Main activities

AviaAM Leasing is a holding company together with its subsidiaries (referred to as “the Group”) established to acquire, lease and trade commercial aircraft. The Group’s primary focus is on the market for used aircraft, primarily on aircraft ten years of age or older. The Group is principally engaged in purchasing commercial aircraft which the Group, in turn, lease to airlines around the world to generate attractive returns on equity. The Group leases its aircraft to airlines pursuant to net operating (“dry”) leases that require the lessee to pay for maintenance, insurance, taxes and all other aircraft operating expenses during the lease term.

In addition to aircraft operating lease activities, the Group is actively engaged in aircraft trading business through acquiring, refurbishing and subsequent sale of aviation assets. Through long-standing relationships and extensive market knowledge, the Group acquires aircraft from airline operators, other lessors, trading entities, financial institutions and directly from the manufacturers. These acquisitions are made with the intent of subsequent sale of the aircraft either in “as-is” condition or after performing certain technical modifications in order to meet the client’s requirements.

While Group’s primary business is to own, lease and trade aircraft, the Group also provides consulting, aircraft transaction management and remarketing services to third parties for a fee. These services are similar to those the Group performs for its fleet, including leasing, re-leasing, lease management and sales services. Thanks to Group’s extensive market intelligence gathered from its daily contacts with other market participants, the Group is well positioned to advise its clients on the best terms and conditions available in the market, and to provide assistance and know-how to its clients in the field of structuring and maintaining their aircraft portfolios.

Environmental protection

In its activities, the Company uses all available means and the modern technological processes that meet all ecological standards and help reduce the negative impact on the environment.

Risk management

The Group's activities expose it to a variety of financial risks: market risk (including currency risk, cash flow interest rate risk), credit risk, liquidity risk. The Group's overall risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the financial performance of the Group.

Risk management is carried out by the General Manager. The General Manager identifies and evaluates financial risks in close co-operation with the Chief Financier. The General Manager provides principles for overall risk management, as well as policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk and investing excess liquidity.

The Group operates internationally and is exposed to foreign exchange risk arising from the Group's exposure to different currencies other than its functional currency (primarily to LTL and EUR). Foreign exchange risk arises when future commercial transactions or recognized assets or liabilities are denominated in a currency that is not the Group's functional currency.

Foreign exchange risk is controlled by entering into most contracts in the functional currency (USD) and monitoring exposures to other currencies.

Credit risk arises from cash and cash equivalents and deposits with banks and financial institutions, as well as credit exposures to customers, including outstanding receivables and loans granted.

Credit risks are controlled by the application of credit terms and monitoring procedures. Group procedures are in force to ensure that services are sold only to customers with an appropriate credit history and do not exceed acceptable credit exposure limit. Cash transactions are limited to high credit quality financial institutions.

Risk of credit concentration is determined by the Group in relation to industry in which Group debtors operate. Concentration of credit risk of the Group arises from loans granted and receivables from related parties, trade receivables. Only material credit risk concentration is with debtors operating in aviation business.

Liquidity risk management implies maintaining sufficient cash and the availability of funding through an adequate amount of committed credit facilities. Liquidity risk is managed by the General Manager, who is required to maintain a minimum required liquidity position.

In addition, the Group's liquidity management policy involves projecting cash flows and considering the level of liquid assets necessary to meet these.

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

Consistent with others in the industry, the Group monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including 'current and non-current borrowings' as shown in the consolidated balance sheet) less cash and cash equivalents. Total capital is calculated as 'equity' as shown in the consolidated balance sheet plus net debt.

Significant events after the balance sheet date

In March 2015 the Group entered into the Letter of Intent in respect to sale of one Boeing 737-000 airframe.

In March 2015 the Group rendered aircraft transaction management services in respect to one Boeing 777-300ER sale and lease-back transaction pursuant to the agreement entered in August 2014.

Plans and forecasts

The Group intends to further follow a disciplined approach to future aircraft acquisitions, seeking to create a portfolio of aircraft in the niche markets for used, midlife to end-of-life (generally, ten years of age or older) narrowbody jet and regional aircraft and to further expand its activities in the fields of aircraft trading and management. To execute this strategy, the Group will focus on the following:

- Generating higher yields: the management of the Company believes the aforementioned target assets typically have higher lease rates relative to their purchase price (i.e. as the lease rate factor) than newer aircraft, thus allowing the Company and the Group to generate attractive, cash-on-cash yields;
- Identifying transactions that are not widely marketed: through the management's relationships with aircraft lessors, financial investors and brokers, the Group expects to have access to transactions that are not widely marketed;
- Strategically acquiring attractive assets during market weakness: while the Group intends to be active in the aircraft leasing market throughout market cycles, the Group will seek to take advantage of the cyclical nature in the aviation industry by opportunistically acquiring selected aircraft during market downturns;
- Providing for flexible resales and part-out: the Group expects to employ a flexible divestment strategy to allow to sell assets when the market cycle makes asset sales most advantageous;

(All tabular amounts are in USD'000 and LTL'000 unless otherwise stated)

- Focusing on high growth markets: the Group is primarily focused on the Eastern European, Russian and CIS markets; however due to the nature of the aircraft operating leasing business the Group is seeking for expansion of the geography of operations into other markets such as Western Europe, Middle East and Southeast Asia.
- Expanding the scope of services provided by the Group: in addition to aircraft leasing and trading business lines, the Group intends to further expand its aircraft transaction management, consulting and asset management activities leveraging the successful track record of the executed transactions and experience and know-how of the management.

Acquisitions of aircraft either for leasing or trading activities will be pursued through the co-operation with aircraft operators, manufacturers, financial institutions, private investors and third party lessors.
